Manufacturing Infrastructure

Our manufacturing ecosystem spans major Indian craft clusters, enabling scalable bulk production across multiple categories. We follow structured workflow controls including dimensional checks, surface inspection, polish verification, assortment accuracy validation, and packing integrity testing.

Quality & Compliance

Every export order passes through structured quality checkpoints covering material validation, finish inspection, dimensional verification, and pre-dispatch packing review. Our compliance standards support international buyer documentation and shipment readiness.

Certifications & Standards:

ISO 9001 Quality Management

FSC® (Applicable Categories)

REACH Compliance

Lead-Free Finishing (Applicable Categories)

MOQ & Supply Capability

DYLAA™ operates with a B2B-first supply model. MOQ-based pricing is structured according to category, assortment mix, finish complexity, and destination country requirements.
